FEATURES

- INNOVATIVE DESIGN & PROTOTYPE TESTING are key components of GENERAC'S success in "IMPROVING POWER BY DESIGN." But it doesn't stop there. Total commitment to component testing, reliability testing, environmental testing, destruction and life testing, plus testing to applicable CSA, NEMA, EGSA, and other standards, allows you to choose GENERAC POWER SYSTEMS with the confidence that these systems will provide superior performance.
- TRUE POWER[®] ELECTRICAL TECHNOLOGY: Superior harmonics and sine wave form produce less than 5% Total Harmonic Distortion for utility quality power. This allows confident operation of sensitive electronic equipment and micro-chip based appliances, such as variable speed HVAC.

 MOTOR STARTING ABILITY

- SOLID-STATE, FREQUENCY COMPENSATED VOLTAGE REGULATION. This state-of-the-art power maximizing regulation system is standard on all Generac models. It provides optimized FAST RESPONSE to changing load conditions and MAXIMUM MOTOR STARTING CAPABILITY by electronically torque-matching the surge loads to the engine. An unequalled ±1% voltage regulation.
- SINGLE SOURCE SERVICE RESPONSE from Generac's extensive dealer network provides parts and service know-how for the entire unit, from the engine to the smallest electronic component.
- GENERAC TRANSFER SWITCHES. Long life and reliability are synonymous with GENERAC POWER SYSTEMS. One reason for this confidence is that the GENERAC product line includes its own transfer systems and controls for total system compatibility.

FEATURES

ENGINE	•Generac (OHVI) Design	Maximizes engine "breathing" for increased fuel efficiency. Plateau honed cylinder walls and plasma moly rings help engine run cooler, reducing oil consumption. Because heat is the primary cause of engine wear, the OHVI has a significantly longer life than competitive engines.
	 "Spiny-lok" cast iron cylinder walls 	Rigid construction and added durability provide long engine life.
	•Electronic ignition/spark advance	These features combine to assure smooth, quick starting every time.
	Full pressure lubrication system	Superior lubrication to all vital bearings means better performance, less maintenance and significantly longer engine life. Now featuring a 2 year/200 hour oil change interval.
	•Low oil pressure shutdown system	Superior shutdown protection prevents catastrophic engine damage due to low oil.
	 High temperature shutdown 	Prevents damage due to overheating.
	 Revolving field 	Allows for smaller, light weight unit that operates 25% more efficiently than a revolving armature generator.
TOR	Skewed stator	Produces a smooth output waveform for compatibility with electronic equipment.
ERA	• Displaced phase excitation	Maximizes motor starting capability.
GENERATOR	Automatic voltage regulation	Regulates the output voltage to $\pm 1\%$ prevents damaging voltage spikes.
	•UL 2200 Listed	For your safety
TRANSFER Switch	Sold separately	
	•Manual/Auto/Off switch	Selects the operating mode.
	 Utility voltage sensing 	Constantly monitors utility voltage, setpoints 60% dropout, 80% pick-up, of standard voltage.
	• Generator voltage sensing	Constantly monitors generator voltage to ensure the cleanest power delivered to the home.
ROLS	•Utility interrupt delay	Prevents nuisance start-ups of the engine, adjustable 10-30 seconds.
DNT	•Engine warm-up	Ensures engine is ready to assume the load, setpoint approximately 5 seconds.
Ŭ ₹	•Engine cool-down	Allows engine to cool prior to shutdown, setpoint approximately 1 minute.
NEXUS [™] Controls	• Programmable seven day exerciser	Operates engine to prevent oil seal drying and damage between power outages by running the generator for 12 minutes every week.
Z	•Smart battery charger	Delivers charge to the battery only when needed at varying rates depending on outdoor air temperature.
	Main Line Circuit Breaker	Protects generator from overload.
	•Electronic governor	Maintains constant 60 Hz frequency.
E	Weather protective enclosure	Ensures protection against mother nature. Hinged key locking roof panel for security. Lift-out front for easy access to all routine maintenance items. Electrostatically applied textured epoxy paint for added durability. Model 005886-0 has aluminum enclosure.
LIND	•Enclosed critical grade muffler	Quiet, critical grade muffler is mounted inside the unit to prevent injuries.
	•Small, compact, attractive	Makes for an easy, eye appealing installation.
INSTALLATION System	 1' Flexible Fuel Line Connector Composite Mounting Pad 	Easy Installation
